

# Heavy Breathing

By: Abraham Bergian High Tech Magazine May 1997

If you run a highly modified third or fourth generation F-body, have we got an exhaust for you?

Denny Tarcza who is the owner of Mufflex Performance Exhaust Specialists in Trenton, NJ has constructed a mandrel-bent, single 4-inch exhaust system for all 1982-97 Camaros and Firebirds. The system incorporates all aluminized tubing to resist rusting and a FLOWMASTER ® Muffler. Not just any FLOWMASTER, but one of their big-block competition pieces.

Denny says it's completely bolt-in assembly, which can be mail ordered and installed with simple hand tools in a driveway. You can see just how massive the system is when it was placed next to Denny and HTP contributor Ray Bohacz.

Shortly we'll be showing you the complete installation of one of these 4-inch systems on an LT1 Firebird and its power advantage, both on the dyno and on the strip. For more info, Call Denny at Mufflex at (609) 890-0481; fax: (609) 890-8752.
